

REMANUFACTURED SUBARU DRIVESHAFTS

We're now stocking exchange Subaru driveshafts. We remanufacture these driveshafts using OEM style u-joints that are "staked-in" just as they are done in the factory. Over years of testing, we've found that this is the best way to remanufacture Subaru driveshafts for a trouble-free, long life.

OEM style
"staked-in"
U-joint

\$150-\$200*

*Price depends on application. A \$75 core charge applies. Price includes free UPS ground shipping and core return shipping. Credit cards accepted.
